

Top FaceLock Applications

Summary: We could find a handful of apps which are based on face recognition and they are shared below.

1. **FaceLock for apps**(Installs: 1,000,000 - 5,000,000,Rating:4.0,Cost:62.92 per item,Size:6.9M,Updated: September 25, 2015)

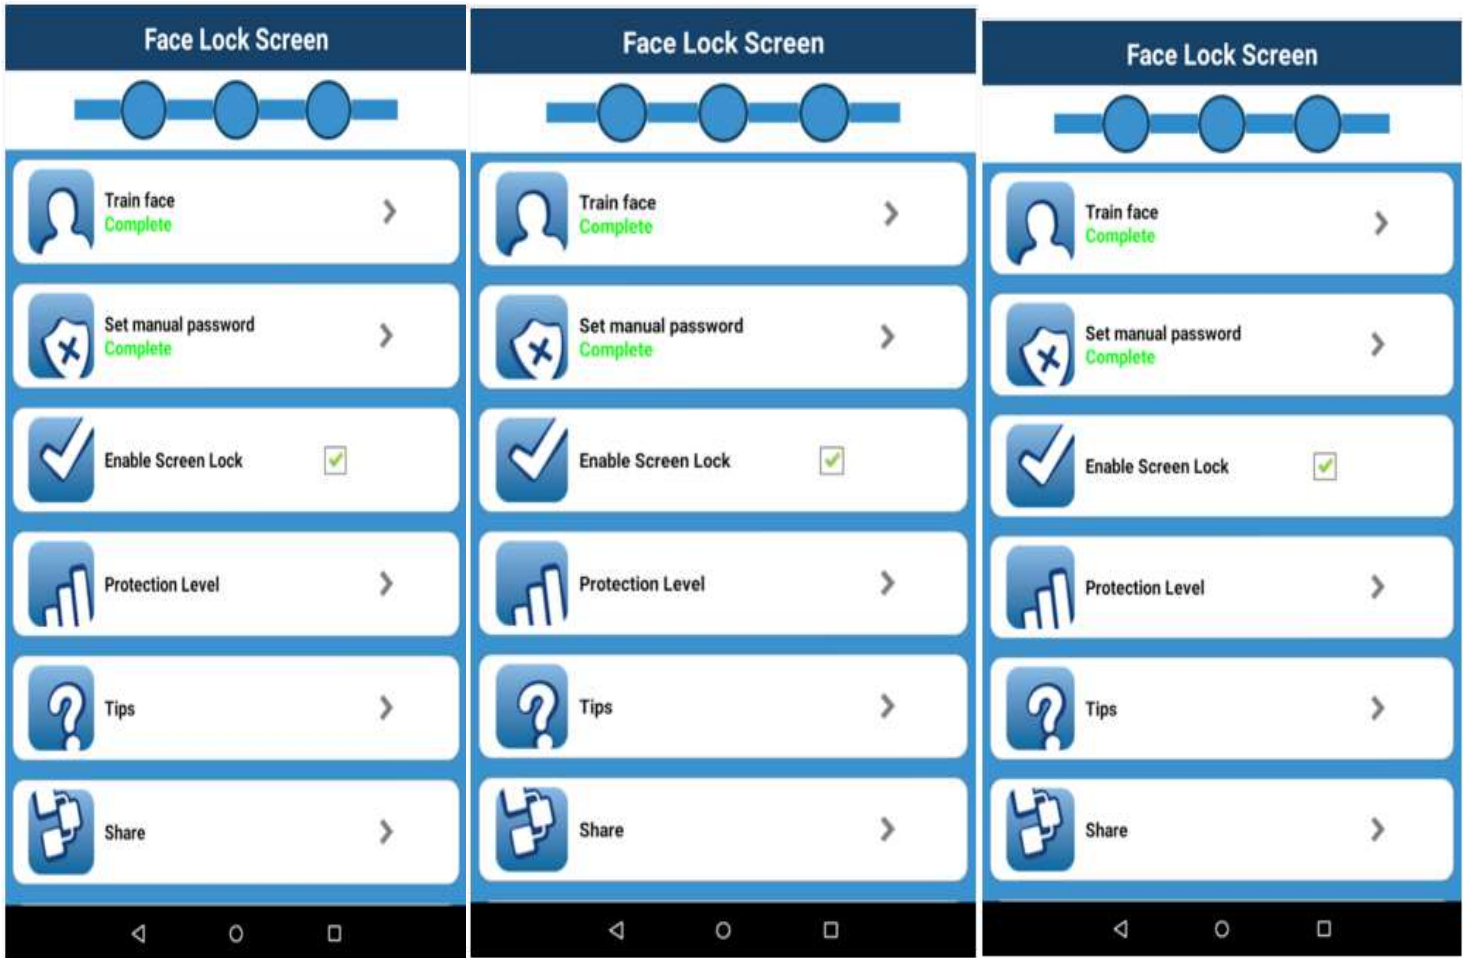

Use FaceLock to protect your apps with your face! Your face is the key to unlock them. You can use FaceLock to protect your mobile phone against theft, by locking apps (applock), as a gallery lock or to lock whatsapp and facebook so nobody can spy on you.

This free version will lock the protected apps: market, task manager, settings and one app of your choice. *PLEASE* DON'T RATE THE APP BEFORE READING WHAT THE APP IS SUPPOSED TO DO. Now PIN access is also available in this FREE version! Some tips on how to do the training properly:<http://www.facelock.mobi/tips-and-faq>

Summary: The app does not load when the protected app is launched. There is a pro version with more functionality. This app does not do what was communicated in my download and installation, may be earlier versions worked fine.

2. **Face Lock Screen**(Installs: 100,000 - 500,000,Rating:3.7,Cost:free,Size:7.9M,Updated: October 1, 2015)

Here is the best app face lock screen.

Use Face Lock Screen to protect your screen with your face! Your face is the key to unlock screen lock.

It is based on most reliable advanced technique to protect you.

Face lock Screen Free app is not require any technical knowledge from you just do the following steps :

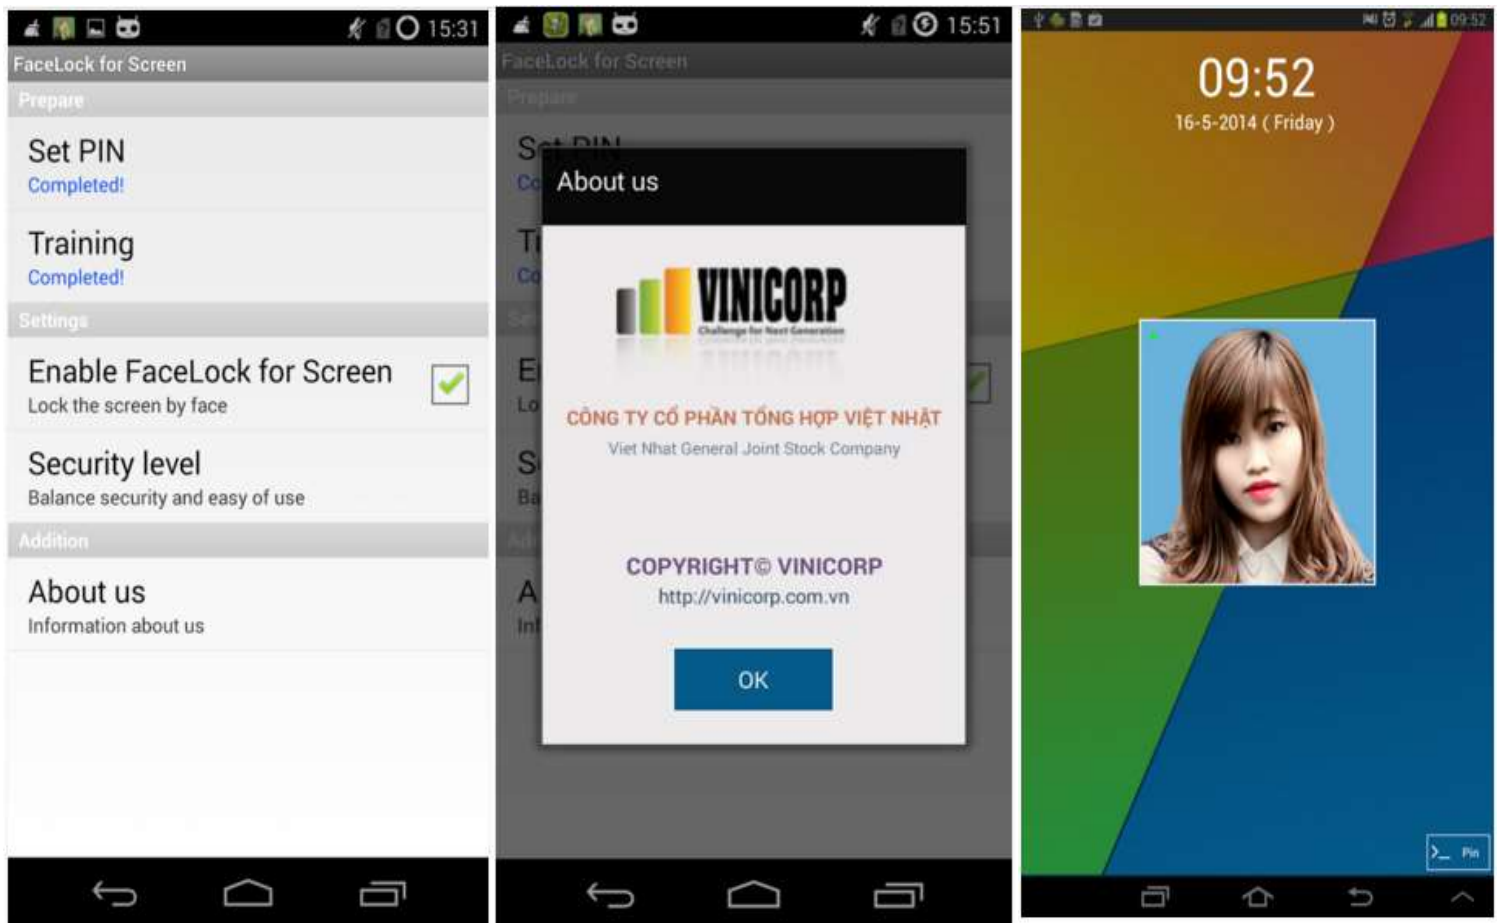

1. Train your face. Just push on train face button and it will do automatically in later to recognize your face
2. Set password
3. Check enable screen lock

Summary: The app crashes when used. Some users reported they could use the app and some has similar issues as I did while using the app.

3. **Lock by Face** (Installs: 500,000 - 1,000,000, Rating: 3.8, Cost: free, Size: 6.7M, Updated: November 12, 2015 ☺)

Lock by Face" application is developed by **VINICORP** company.

This application is free and developed base on OPENCV (Open Source Computer Vision Library)

<http://opencv.org/>

Main functions of "Lock by Face" application !

- Lock and unlock screen by recognize your face.
- Allow setting alternative method to unlock screen by enter PIN Code.
- Allow setting Security level Hard, Normal, Easy when recognize your face .
- Easy to training your face for smart phone.
- Independent Android OS because this is stand alone application.
- Faster and faster, more intelligent because we use OPENCV technology.

Manual :

Step 1: Start app and set PIN for alternative access method.

Step 2: Training to recognize your face.

Summary: This app does what is communicated(or works) but fails terribly in identifying faces and unlocking the app for new untrained faces as well.
